

**European
Charcot
Foundation**

There have been recent important progresses in the definition of diagnosis, prognosis and treatment of NMOSD/MOGAD which are now treatable diseases.

The European Charcot Foundation, in collaboration with the European network of NMOSD and MOGAD, plans a workshop in Tokyo, JAPAN, 13-14 February 2026.

The first day aimed to update the most recent advances in these diseases, and the second day is dedicated to free communications and to industry symposia.

Both the in-presence and virtual active and passive participation are possible because we want to allow experts from all continents to attend it, however, the physical participation is very welcome in order to facilitate interactions and future collaborations.

[Official language is English.]

Update on NMOSD and MOGAD 2026

**ITO international Research Center,
The University of Tokyo
TOKYO, JAPAN
13(Fri)-14(Sat) FEBRUARY, 2026**
